DETAILED ACTION

1. REASONS FOR ALLOWANCE:

Claims 4, 15, 18, and 19 are allowable because the instant application is directed to a nonobvious improvement over the invention described in patent no. US 5,864,432 (Deter), US 6,325,524 (Weber et al.) and US 6,346,771 (Salam). The improvement comprises:

wherein a multiplicity of red, a multiplicity of blue and a multiplicity of green light-emitting diodes are arranged without packaging on a common support; wherein the number of light-emitting-diodes of one color is adapted to the spectral sensitivity of the eye and to the spectral efficiency of the diodes. *This patentable distinction is included in independent claim 4.*

selecting individual ones of the light emitting diodes by color in accordance with the spectral sensitivity of the eye to cause an observer to experience a sensation of brightness, thereby to accomplish a dimming of the head-up display. *This patentable distinction is included in independent claims 18, and 19.*

the light from a light source is transmitted through an at least partially light-transmitting display and is projectable onto a windshield, wherein a multiplicity of red, a multiplicity of blue and a multiplicity of green light-emitting diodes are arranged without packaging on a common support; wherein there are a plurality of display and plurality of said light sources. *This patentable distinction is included in independent claim 15.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
